SIX STEPS TO FIRE

- 1 Determine the BTU (gas) supply at your fire feature location.
- 2 Measure the interior dimensions of your fire feature and choose the corresponding plate/pan size.
- 3 Select burner based on plate/pan size and fuel type (natural gas or liquid propane.)
- 4 Choose the ignition system: match lit or a fully automatic ignition system.
- 5 Add optional electronic accessories: remote control options, dial timers, and emergency stop buttons.
- 6 Complete your fire feature with media: lava rock or fire glass, steel or ceramic logs.

PLEASE REMEMBER

- Plate/pan should be sized slightly smaller than the measurement of the opening to allow easier installation and removal for service.
- Manufacturer recommends a minimum 3" of clearance from all interior sides of enclosure to the nearest edge of burner to avoid damage to enclosure.

- For outdoor use only. Installation and service must be performed by a qualified installer, service agency, or gas supplier. Installation and use must follow all local codes.
- Follow all installation instructions and local codes. A copy of the Owner's Guide and Instruction Manual can be found on our website: www.Warming-Trends.com

TECH TIP

Gas Insert Kits for Paver Fire Features are becoming more popular and Warming Trends offers kits - including burner, plate, flex line, and key valve kits - specifically designed to work with a variety of paver company block features. See page 41 for our Gas Insert Kit selections.

Plate should be sized slightly smaller than the measurement of the opening. This allows easier installation and removal for service.
